

PRESSURE RELIEVING COMFORT

Serta's exclusive **Advanced Comfort Quilt**[®] system provides enhanced comfort while helping to reduce the tossing and turning that disrupts peaceful sleep. Plus, the unique construction of this system allows air to flow easily through the mattress for up to 42% more cooling power than a traditional memory foam mattress, which means less heat build up and a more comfortable sleep surface temperature. Available in all Perfect Sleeper mattresses.

Serta's space age Visco-elastic **Memory Foam** gently conforms to your body and contours to your sleeping position. As your body is surrounded in cradling comfort, the Memory Foam helps to reduce the pressure points that can cause you to toss and turn, wake up and shift positions. The result is an extremely comfortable and more restful sleep. Available in select Serta Perfect Sleeper mattresses.

Serta's **Latex Foam** instantly responds to your body for pressure-relieving comfort you feel the moment you lie down and throughout the night. This foam is also extremely breathable and resilient, allowing it to sleep cool and maintain its integrity throughout the life of your mattress. Plus, Serta Latex is naturally antimicrobial and hypoallergenic for a healthier night's sleep. Available in select Serta Perfect Sleeper mattresses.

This advanced convoluted, or "egg crate", foam works to distribute weight evenly and help alleviate pressure points that can cause discomfort. Our **Zoned Convoluted Foam** is designed to provide additional pressure relief where your body needs it most - at the shoulders and hips.
